

## Limited availability promotions

To celebrate the unveiling of VADEX-pro Technology in ACVR 2024, VAXSIA is making a promotion for providing 10 VADEX-pro based protein nanoparticle preparation services at a discounted price.

The services provided in this promotion

1. 2 mg of VADEX-pro protein nanoparticle incorporated with the antigen of your choice.
2. The expression of the protein of your choice in mammalian cell.
3. 200  $\mu$ g of your protein of choice for assay.
4. A full license for developing monoclonal antibody derived products of any kind against the protein of your choice using purchased protein nanoparticle.

**Only 10 slots available**
